

GALIANO ISLAND RECYCLING RESOURCES SOCIETY REDIRECTORY POLICY & PROCEDURE

Rationale:

The Redirectory receives and equitably redistributes, through donations and auction, re-usable items to benefit the residents of Galiano by reducing the impact of consumerism on the environment, enhancing Galiano's sharing culture, and providing opportunities to acquire redirected items at low cost. The Redirectory is operated with the sole purpose of redistribution of goods by, for and within the Galiano community.

Policy:

The Redirectory has become an important part of our community on Galiano. Located at the GIRR recycling site, the Redirectory provides a second life to products that would have otherwise ended up in a landfill, a burn pile, or squirrelled away in an attic. The Redirectory's sole source of income is through donations and silent auction. Items must be in good shape; reusable, redirectable, recyclable, clean & in working condition. The Redirectory relies heavily on the efforts of our tireless staff and volunteers.
